CHAPTER 1 An Introduction to Financial Management

CHAPTER ORIENTATION
This chapter lays a foundation for what will follow. First, it focuses on the goal of the firm, followed by a review of the legal forms of business organization. Ten principles that form the foundations of financial management then follow.

CHAPTER OUTLINE
I. Goal of the firm
   A. In this book we will designate maximization of shareholder wealth, by which we mean maximization of the total market value of the firm's common stock, to be the goal of the firm. To understand this goal and its inclusive nature it is first necessary the various activities that an organization engages in have financial implications and tend to either consume finance or generate finance in the form of profits.
