Anne & Scope
JITEJ is a peer-reviewed journal, focuses on international economics, economic development and, more importantly, the interplay between trade and development. The links between trade and development economics are critical at a time when both fluctuating commodity prices and trade liberalisation and agreements can radically affect the economic well-being of countries.

JITEJ is designed to meet the needs of international trade and development economists, economic historians, applied economists and policy makers. The international experts who make up the Journal's Editorial Board encourage contributions from economists worldwide.

Use The Chicago Manual of Style system of referencing (1976). If an author has two references published in the same year, add lower case letters to differentiate them.

Footnotes should be used only where necessary to avoid interrupting the continuity of the text. They should be numbered consecutively using Arabic numerals. They should appear at the end of the main text, immediately before the list of references.

Submissions should include a title page, in alphabetical order, at the end of the article. The content and format should conform to the following examples.

Multiple authors: A business of national London: Methuen.

9. Page proofs will be sent for correction to a first-named author, unless otherwise requested. The difficulty and expense involved in making amendments at the page proof stage will be considerably increased if corrections are made at this stage.

11. Corresponding authors will receive free online access to their article through our website (www.rjte.org) and a complimentary copy of the issue containing their article. Corresponding authors should also ensure that their names and email addresses are up-to-date in the information provided by them when they submit their manuscripts. If proofs are received or alternatively on our journals website. To request complimentary copies for yourself and a maximum of ten co-authors, please contact our reprints department at reprints@tandf.co.uk.

JITEJ aims to make the submission process as easy as possible for authors. New users should first create an account. Once a user is logged onto the site submissions should be made via the Author Centre.

Submission of a paper to the journal will be taken to imply that it presents original, unpublished work not under consideration for publication elsewhere. The submitter of a paper will have the right to define the non-exclusive ownership of the publication as ‘First Fix not for review’. When submitting your manuscript, please upload all of your original source files.

Submissions should be in English, typed in double spacing with wide margins, one side only of the paper, preferably of A4 size. The title, but not the author’s name should appear on the first page of the manuscript. Furthermore, to assist objective reviewers of the day, the author should avoid any reference to him or herself which would enable identification by referees. Articles should normally be concise. The difficulty and expense involved in making amendments at the page proof stage will be considerably increased if corrections are made at this stage.

Tables and figures should not be included in the pages of the manuscript but should be set on separate sheets. They should be numbered consecutively in Arabic numerals with a descriptive caption. The desired position in the text for each table and figure should be indicated in the margin of the manuscript. Permission to reproduce copyright material must be obtained by the authors before submission and any acknowledgement should be included in the typescript or captions as appropriate.

Use The Chicago Manual of Style system of referencing which gives the name of the author and the date of publication as a key to the full bibliographic details which are set out in the list of references. When the author’s name is mentioned in the text, the date is inserted in parenthesis immediately after the name, as in ‘Smith (1970).’ When a less direct reference is made to one or more authors, both name and date are bracketed, with the references separated by a semicolon; as in ‘(Smith 1970, Cook 1968, Dobbs 1973).’ Where the reference is to a work of dual or multiple authorship, use only surnames of the abbreviated form as in ‘(Smith and Dobbs 1978)’ or ‘Jones et al (1978).’ If an author has two references published in the same year, add lower case letters to differentiate them.
