**Narrative Therapy References**

Play therapy is a method of meeting and responding to the mental health needs of children and is extensively acknowledged by experts as an effective and suitable intervention in dealing with children’s brain development. It is generally employed with children aged 3 years through 11 and provides a way for them to express their experiences and feelings through a natural, self-guided, self-healing process. As child experiences and knowledge are often communicated through play, it becomes an important Superheroes in Play Therapy With an Attachment Disordered Child Carmela Wenger The Role of Neuroscience The Therapeutic Appeal of Superheroes to the Child With Attachment Disorder An Orientation to Treatment Case Study Luke, I Am Your Father! A Clinical Application of the Star Wars Adoption Narrative Lawrence C. Rubin Adoption, Superheroes, and Star Wars The Reality of Adoption The Case of Alex Conclusion. Scanlon served on the board of the Indiana Association for Play Therapy from 1997 to 2001 and as InAPT President 1999â€“2000. Since then, she has been involved as chair of various committees of the Association for Play Therapy. She enjoys gardening and playing with her four dogs, Shiva, Erin, Kali, and Plato. Back to top.
